Small Printer Delivers Big Savings

Fairfield, N.J., January 11, 2005

Kyocera Mita America, one of the world's leading document imaging companies, today added two cost-effective, network-capable printers to the Company's printer portfolio – the FS-820 and FS-920 monochrome ECOSYS printers. A desktop solution designed to meet the printing demands of today's fast-paced office environment, the FS-820 and FS-920 deliver 17 page per minute (ppm) and 19 ppm output, respectively. The printers feature true 600x600 dpi output, as well as an interpolated 1200x600 dpi output. In addition, the printers produce crisp text and image production and the ability to print on a variety of paper stocks including 16-28 lb bond

via the paper drawer, and 16 lb bond – 90 lb index via the multi-purpose tray. In addition, the FS-820 and FS-920 have the ability to print on recycled paper, transparencies, labels and envelopes. "In order to stay competitive organizations need the flexibility and efficiency of affordable desktop printing without sacrificing quality," said Richard Berberian, printer product marketing manager for Kyocera Mita America. "Our goal is to provide end-users with high performance, reliable products with a low total cost of ownership. The FS-820 and FS-920 are no exception – fast and productive, a low acquisition cost and low output costs result in increased efficiency and an improved bottom-line for any organization."
